

The integrated P&O Ferrymasters solution: THE POZNAN – UNITED KINGDOM INTERMODAL RAIL SERVICE

The P&O Ferrymasters Poznan train is an integrated one-stop solution linking the United Kingdom, Benelux and Poland via Europoort in Rotterdam, and provides a link between the CLIP terminal in Swarzedz-Poznan to Europoort.

More and more our customers are looking for integrated solutions to their transport challenges across Europe. With operations in more than 20 strategic locations in 13 countries, P&O Ferrymasters is the leading provider of pan-European transport and supply chain solutions.

Our cross-European Poznan train is a one-stop solution for exports to the lucrative markets of Britain and the Low Countries, with increased payloads, reduced CO2 emission and at a price very competitive with road haulage. Our service is regular and reliable: there are 7 rotations per week in both directions, with the Poznan to Rotterdam journey taking just 20 hours.

Each train has 36 huckepack trailers, able to carry up to 28 tonnes each, and the ability to carry containers on request, including 45'PW units. Equipment going to and from the United Kingdom is transhipped from the train to ferry and vice versa at the P&O Ferries terminal in Europoort.

This is an excellently priced and reliable service provided by P&O Ferrymasters. Please contact us for more information:
